Continuation of Substance of Interview including description of the general nature of what was discussed: The Examiner contacted Applicants' representative and noted that the case is close to being in condition for allowance, except for a 101 issue regarding claim 19. The Examiner suggested adding language about the system comprising a processor executing instructions and that this would cure the 101 deficiency. Furthermore, the Examiner noted that a grammatical issue with each of the independent claims should be corrected. Applicants' representative agreed to the changes which will be made via examiner's amendment.
